Magnificent Mesopotamia

Have you ever heard of a city-state? There are awesome! So if you want to learn about it then read this paper! The Fertile Crescent is cool too! It is shaped like a quarter moon! If you want to find out what goes on in Mesopotamia read this paper! Have you ever wanted to learn about what other laws are out there? Well then read the rest of this paper because I'm going to teach you about Hammurabi's code!

Mesopotamia in the Fertile Crescent. Mesopotamia is in the Fertile Crescent. The Fertile Crescent is shaped like a quarter moon. There are lots of other cities in the Fertile Crescent. How the people make life in Mesopotamia are because of the Tigris and Euphrates rivers. They help Egypt too.

The city states in Mesopotamia. City-states are like little countries. City-states have there own government. They are ruled by there own ruler witch they choose. They even have there own army! So they have wars between city-states.

The laws of Hammurabi's code. Hammurabi's code has several rules. So I'm

only going to tell you a few. One law is that if you hit your dad you get your hand cut off! Another one is if you build a house and it collapses on the person who bought it and they die you got killed! I don't think these laws are fair some of them are but just like three! Now do you think going to jail for like five years for something is harsh? Well try living in Mesopotamia.

Go to Mesopotamia. You will have a great time at least I know I would. It will be the greatest vacation ever! You will be going to the most exiting place ever but whatever you do I wouldn't disobey Hammurabi's code! That code is harsh. I mean if you slap someone your hand gets cut off! That is really harsh don't you think? Well I sure do. I wouldn't want to disobey that code if I went to Mesopotamia. I would probably be dead before I can come back. On the other hand Mesopotamia is a great place. I wish I could go there someday. I hope you can go there someday too. It would be a great experience, so if you want "travel" to Mesopotamia grab a book about it and read!
